# THE WAYSIDE GAP DE IS COMPANY

E. H. SCHULTZ

MENTOR, OHIO

J. J. GRULL FUARIS

Largest Growers of Hardy Plants in American

# HIGHEST HONORS

WAYSIDE GARDENS exhibits win highest honors two years in succession. These awards represent the judgment of the keenest and most critical minds in our line of business. They reflect especially the plant material that went into the making of these gardens.

AWARDED BY CLEVELAND FLOWER SHOW AT THE SPRING FLOWER SHOW HELD IN CLEVELAND, 1925

# Greetings to Gustomers Old and New,

HREE factors are most essential to business success, which is only another term for work well done, service ably performed. ABILITY or skill, the MEANS to see things through, and ENERGY to follow the product through to the end desired—these factors, in a short decade, have caused this organization to grow in a comparatively short time to the leadership among hardy plant producers in America.

Back of it all, men and methods combine with but one ideal in mind—to produce and deliver the finest hardy perennial plants, rock plants, and lily bulbs obtainable anywhere. Our men have the skill! Combined with highly developed methods of culture on land ideally fit, we grow plants that within one short season produce finished gardens.

But our interest does not cease there. Above all, the buyer must be satisfied. It is our aim and ambition to cause Wayside Gardens to be looked upon as the last word in hardy plant service, the greatest source of a field-grown product, the like of which is unobtainable elsewhere.

We are deeply grateful to those who have helped us grow, for their confidence in our sincerity of purpose and their faith in our ability to make good any promise given in any of our advertisements or printed matter. With this goes the assurance that for 1926 we are splendidly prepared and equipped to take care of all orders that may be intrusted to us.

#### ANEMONE - Windflower

ANEMONE JAPONICA (Japanese Anemone).

Valuable plants suitable for massing or single specimens. They grow rapidly and are profuse in bloom, gaining strength and beauty each year. The blooming period extends from August till mid-November, the large, open flowers furnishing abundant cut flowers and a brilliant field display. Cover plants in Winter. We offer strong, field-grown roots only.

We offer strong, held-grown roots only.		D	100

Asclepias Tuberosa.

Aquilegia—Columbine. Scott Elliott Hybrids are the best.

Armeria-Sea Pink; Thrift.

Arenaria Montana.

Artemisia Lactiflora.

#### AQUILEGIA - Columbine

As a cut flower the Long-Spurred Aquilegias are the daintiest of our outdoor grown flowers. They come in blues, whites and yellows, and shades of pink and rose in strains reasonably true. Practically all the various shades and colors are in the Coerulea Hybrids. They remain in bloom for a long season and are vigorous and long lived. They are not at all particular as to soil or location, although they prefer a sandy loam and a moist but well drained, sunny position, and usually make themselves at home in any hardy border or rockery. Their period of flowering covers the late Spring and early Summer months. Taken as a whole, they are a most important part of the hardy garden, and should be grown in quantity by every lover of old-fashioned garden flowers.

Canadensis (Common American Columbine). The native bright red and yel-	ee Doz.	100
low variety, and one of the brightest\$0.	85 \$2.50	\$18.00

#### ARMERIA (Sea Pink or Thrift).

Attractive dwarf plants that will succeed in any soil, forming evergreen tufts of bright green foliage, from which innumerable flowers appear in dense heads, on stiff, wiry stems, from 9 to 12 inches high. They flower more or less continuously from early Spring until late in the Fall. Very useful in the rockery and border edgings.

# New Imported Hardy Asters

We are offering on this page a collection of New Hardy Asters. The newest varieties are indicated thus (\*), and were selected by Mr. Grullemans, while in Europe, from more than a hundred recent introductions. We have priced them reasonably, and suggest their use in place of the older and less attractive varieties which are commonly listed.

#### HARDY ASTERS (Michaelmas Daisies)

The many species, widely distinct from each other in habit and form, are with a few exceptions, all native of North America. It is in Europe, however, that our Asters have been most highly appreciated. Many improvements have been made by European growers, and many hybrid forms have been produced by crossing the different species. For the best results, they require division and replanting every third year.

# Hardy Garden Chrysanthemums

The following varieties are perfectly hardy if grown in a place not too wet. After through flowering cut the dead stalks down to two or three inches of the ground and cover with dry leaves. In the Spring, after they start to grow, divide so one shoot will remain for the future plant.

#### CHOICE NAMED VARIETIES

The varieties offered below comprise the choicest new hardy outdoor sorts. We have chosen the earliest to bloom, so that the full enjoyment of these best-of-all Autumn flowers may be derived by those in northern territories where Winter comes early.

Plants offered below are from  $2\,\%$  inch pots and will be supplied in the Spring.

For Autumn deliveries we offer field grown clumps at

Per Three Per Doz. Per 100
\$1.00 \$20.00

We suggest Fall planting in southern states.

#### EARLY-FLOWERING VARIETIES

White Dotty. Splendid white	.85	2.50	15.00

#### CHRYSANTHEMUMS-Continued.

#### HARDY OLD-FASHIONED VARIETIES

We collected from old gardens some of the old-fashioned Chrysanthemums which are really hardy and which bloom in October and November, after all other outdoor flowers are gone. Often in bloom when the snow is on the ground; are very showy. 3 to 4 feet high. When in bloom are a perfect mass of flowers

Old-fashioned Hardy Pink	Three \$0.85		$^{100}_{\$18.00}$
Old-Fashioned Hardy Red	.85	2.50	18.00
Old-Fashioned Hardy White	.85	2.50	18.00
Old-Fashioned Hardy Yellow	1.00	3.00	20.00

The above varieties are supplied in strong, field-grown plants.

We do not advise the planting of Hardy Garden Chrysanthemums in the Autumn in any locality where the temperature, during the Winter, goes ten degrees below the freezing point. In southern or other states where this does not happen, we suggest the use of field-grown clumps. Field plants should also be obtained in the late Autumn for propagating during the

#### CHRYSANTHEMUM MAXIMUM (Shasta Daisy).

The improved varieties of Marguerite, all allied to the Shasta Daisy that adorns our fields in the Spring, are among the most useful of our garden flowers. Not only have these flowers been greatly improved in size and form, but there are now early and late blooming varieties which give a succession of long-stemmed flowers so valuable for vase decoration during four months of the year. Glory of Wayside is a variety worthy of attention, and Etoile d'Or is robust and free-flowering. Mrs. C. Lowthian Bell has enormous flowers with strong stems. The Shasta Daisy has a yellow center with long, white petals, the slender stemspringing from the base of the plant, and is most attractive either in the perennial border or as a cut flower. Common kinds like Alaska have been discontinued.

#### FOR MAY FLOWERING

Three Glory of Wayside. Abundant flowers and blooms early in May; excellent\$0.90	Doz. \$2.75	100 \$19.00
Leucanthemum flore pleno (Double White Shasta Daisy). Flowers double, pure white, of medium size, excellent for cutting; each plant produces from 30 to 50 flowers; perfectly hardy without any protection. Our latest and best addition to the Shasta Daisies	2.50	18.00

#### FOR JULY FLOWERING, ONWARD

Mrs. C. Lowthian Bell. This magnificent

white Marguerite is undoubtedly the largest flowered variety of this class. Flowers frequently measure six inches across, with very broad petals of great substance. Height 2½ to 3 feet	1.20	3.50	25.00
Sutton's Perfection. Beautiful flowers, having long, pure white petals with small, yellow centers. A great favorite, Height 2½ feet	1.20	3.50	25.00

FOR SUMMER AND LATE FLOWERING	NG.	
Arcticum (The Arctic Daisy). Among Fall-flowering perennials this is a perfect gem. It forms an attractive rosette-like clump of pretty dark green foliage, and in September multitudes of flower stems appear, terminated by pure white flowers 2 to 2½ inches in diameter. These begin to develop during the last week in September, and continue in good condition throughout October, and frequently into November	3.00	20.00
Etoile d'Or. Another of the large-flow- ered English type, producing the largest and best flowers of any we have 1.20	3.50	25.00
Uliginosum (syn. Pyrethrum). Giant Daisy. Grows 3 to 4 feet high, covered with large, white, daisy-like flowers from June to September	2.75	19.00

Shasta Daisy, Mrs. C. Lowthian Bell. This is a very fine cut flower variety.

Daisy, Glory of Wayside.

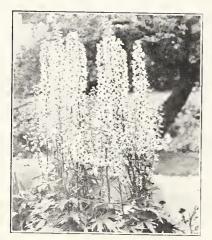

Daisy, Etoile d'Or.

Clematis Davidiana.

Cypripedium Spectabile.

Delphinium Belladonna.

CLEMATIC	DWADE	(Charakhara)
CLEMATIS	, DWAKF	(Shrubby).

Three  Davidiana. A most desirable variety, with fresh, bright green foliage and tubular bell-shaped flowers of deep lavender-blue during August and Sep- tember; deliciously fragrant. 2½ feet. \$1.20	Doz.	100 \$25.00
Integrifolia coerulea. A good border plant, growing from 18 to 24 inches high, producing its small but interesting porcelain blue flowers from June to August	4.00	30.00
Recta. Grows from 2 to 3 feet high, and produces fragrant, pure white flowers in very large, showy clusters during June and July	7.00	50.00

#### CYPRIPEDIUM (Lady's Slipper).

Hardy orchids that thrive in a moist, peaty soil, in shade or partial shade; flowers are very interesting with their odd shapes and uncommon colors and markings.

Three  Acaule (Lady's Slipper; Moccasin Flower).  This is often called the Red Lady Slipper, but the flower is rose-purple in color\$1.00	Doz. \$3.00	100 \$20.00
Pubescens (Large Yellow Lady's Slipper). Very much like Parviflorum, only the flowers are larger. This should be planted in a rich bed in which leaf-mold should be a part, in some moist, yet well drained shady spot	3.50	25.00
Spectabile (Showy Lady's Slipper). The finest and most showy of all our orchids. It grows about two feet high, bearing along the stalk several rather large, roundish leaves, and on top one or two quite large, rose-purple or nearly white flowers	3.50	25.00

# DAPHNE (See Shrubs, page 55). Price, large plants ...... \$2.50 each.

#### DELPHINIUM (Larkspur).

(-u.n.p.u.).			
Belladonna. They are our best blue cut flowers, are perfectly hardy and established plants produce a number of spikes, giving three crops during the season. They are in demand by every florist for decorating, the light blue Belladonna combining especially well with other flowers. The two-and three-year-old plants of Belladonna can be forced in the greenhouse to great advantage		2 50	15.00
•			
2-year. Light sky-blue. Select for forcing		3.00	20.00
<b>3-year.</b> Light sky-blue. Select for forcing		3.50	25.00
Bellamosa. A dark blue of the type of Belladonna with the color of the old Formosum variety, but not liable to mildew like the latter and of stronger growth.			
1-year	.85	2.50	18.00
2-year. Select for forcing	1.00	3.00	20.00
3-year. Select for forcing	1.20	3.50	25.00
Chinense. A very pretty variety, with fine feathery foliage and intense gentian-blue flowers in open panicles	.85	2.50	18.00
Chinense album. A pure white form of the above	.85	2.50	18.00
Formosum. The old-fashioned dark blue Larkspur	.85	2.50	18.00
Nudicaule. A dwarf native of California, producing intense orange-red flowers	1.00	3.00	20.00

#### DELPHINIUM - Larkspur

English Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. Some varieties grow 8 feet high in rich soil. They have immense spikes of most beautiful flowers of every imaginable shade of blue, and their season is long; in fact, they will bloom from Spring till Fall.

The culture of Delphiniums is exceedingly simple. They thrive in almost any position, and may be planted at any time of the year, provided that in Summer the plants are not too forward, and that they be well watered if the weather is dry. The soil may be a rich, friable loam, which suits them finely; but any soil, even hot and sandy, if well watered and manured, will give excellent results. Placed in lines, as a background to a border, or in groups of, say, three plants at intervals, the effect of the Delphinium is exceedingly fine. A succession of flowers may be expected from Spring to early Autumn, especially if the spikes, which have done flowering early, be cut down to the ground; fresh growth will then be produced which will give blossoms. Watering in Summer will increase size of spike and flower. Top-dressing is greatly recommended on certain soils, instead of the bare surface of the ground being left exposed to the sun. Some of the neater dwarf Alpine and other hardy plants may be utilized to plant between and around Delphiniums. Coal ashes strewn over the crowns will protect the plants from slugs through the Winter and Spring. Any garden soil suits the Delphiniums.

# Choicest Wayside Gardens Unnamed Hybrids

Three Doz. Here offered are the newest, the best and the finest to be secured anywhere. The range of colors varies from the palest shade of blue to the deepest indigo-blue and royal-purple with many intermediary pastel tones of mauve, pink and lavender blendings. Among these new hybrids are flowers of huge size in both single and double forms. This strain has been raised from seed saved from the finest named kinds in creation. Visitors at our nursery pro-claim them the best they have ever seen. Those who wish to perfect their already much prized borders cannot afford to overlook these wonderful hy-\$5.00 \$35.00

#### Imported Strain

(Blackmore and Langdon's).  Three Grown from seed of famous named sorts. Introduced by England's fore- most grower of Delphiniums.	Doz.	100
1-year-old plants	\$3.00	\$20.00
2-year-old plants	3.50	25.00

The fine types of Delphiniums unfortunately do not live very long in our country, we therefore advise the planting of one-year-old roots, and in no instance older than two years, so that you may enjoy them the longest possible time.

Plant all hardy plants early and cover slightly the first Winter after planting. Our shipping season opens September 1st. Send your order now.

Delphinium, "Wayside Hybrids."

English Delphiniums, Single Form.

Penduliflorum.

enduliflorum. An exceedingly graceful shrublike plant covered with purplish red flowers in Summer time when little else is in bloom. Strikingly beautiful..\$1.70 \$35.00

#### DICTAMNUS (Gas Plant).

The Dictamnus is one of the most satisfactory hardy plants in cultivation, both on account of splendid flowers and its rich, durable foliage.

Fraxinella	alba		Doz. \$4.00	100 \$30.00
Fraxinella	rubra	1.40	4.00	30.00

#### DIELYTRA OR DICENTRA (Bleeding Heart).

A hardy perennial with heart-shaped, rose-colored flowers in drooping spikes. The base of the flower is furnished with two sheathlike spurs. One of the best border plants; perfectly hardy and easily cultivated. Flowers in April or May. The Bleeding Heart is one of the choicest members of the old-fashioned gardens. They prefer the shaded nooks in the border.

Eximia (Plumy Bleeding Heart). A dwarfgrowing sort, with beautiful finely cut foliage and showy racemes of pretty pink flowers throughout the season. Too much cannot be said for this fine border plant as it is equally at home in full shade or sun and perfectly hardy anywhere. Bailey's "Cyclopedia of American Horticulture" says in description: "The handsomest foliage of any border plant in the entire collection." This variety of Bleeding Heart is the only kind which will replace the Spectabilis which is so hard to get. Will grow in any climate under any conditions.	Doz.	100
<b>2-year-old</b> \$1.20 <b>1-year-old</b> (Strong)85	$\begin{array}{c} \$3.50 \\ 2.50 \end{array}$	\$25.00 18.00
spectabilis (Bleeding Heart or Seal Flower). An old-fashioned favorite; its long racemes of graceful heart-shaped pink flowers are always attractive; it is used largely for forcing and is perfectly at home in any part of the hardy border, and especially valuable for planting		
in clumps. Each. 60c 2.00	6.50	45.00

#### DIGITALIS (Foxglove).

For stately and picturesque beauty it is not to be surpassed, and, planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchards or along brooks, it is extremely effective and satisfactory. It is a biennial, but, as it renews itself from self-sown seed, it may be treated as a perennial.

Giant Shirley Foxgloves. We now have a fine lot of field-grown plants of the Giant Shirley Foxgloves. They are a genuine "Shirley" production of extraordinary size and vigor, growing 5 to 6 feet tall. The flower-heads are over 3 feet long, crowded with big, bell-shaped blossoms. Colors range from white and shell-pink to deepest rose, many attractively dotted with crimson or chocolate. Furthermore, they are more apt to be of perennial	Doz.	100
habit than the old-fashioned Foxgloves. \$1.00	\$3.00	\$20.00
Ambigua or grandiflora. 2 to 3 feet. June and July. A hardy plant, with yellowish flowers, marked with brown. Effective in groups in wild garden	3.50	25.00
Gloxiniaeflora. 3 to 4 feet. June and July. A popular variety, ranging in color from rose to deep purple. Robust habit85	2.50	18.00

Adiantum Pedatum.

Ferns.

Funkia Glauca.

#### FERNS - Hardy Varieties

The cultivation of Hardy Ferns is remarkably simple. All they want is a light alluvial soil, a little loam and peat or leaf-mould sufficient to keep the soil light and open, plenty of moisture, position varying from partial to deep shade. The Aspleniums and many others will grow on walls, chinks of rocks, etc. Many will revel in full sunshine in any ordinary border. There is scarcely a garden or even a back yard where Ferns cannot be grown successfully. Anyone commencing with a few specimens will soon be induced to go on collecting until he has made a feature both interesting to himself, and also to all who see them.

mem.	Three	Doz	100
Adiantum pedatum (Hardy Maidenhair Fern). Most attractive of our native Ferns; black stems with delicate green fronds			
Aspidium acrostichoides (Wood Fern). (Polystichum). An evergreen species with deep green, divided fronds. Should be planted in a shady position. 12 inches		2,50	18.00
Aspidium spinulosum (Dryopteris spinulosa). Spinulosa Woodfern. An evergreen variety that requires rich, well drained soil. 18 to 24 inches.		2.50	
Asplenium filix foemina (Lady Fern). Grows in shade or sun. Large and handsome. 3 feet	.85	2.50	18.00
Cinnamomea (Cinnamon Fern). Erect fronds, drooping at tips, with bright cinnamon colored spores at end of fronds; a very conspicuous variety	1.00	3.00	20.00
Dicksonia punctilobula (Dennstaedtia punctilobula). Hay-scented or Gossamer Fern. Grows well in either sun or shade. 18 to 24 inches. Very erect with broad fronds, of a soft, woolly texture.		2.50	18.00
Onoclea sensibilis (Sensitive Fern). Requires wet places either in sun or shade. 12 inches		2.50	18.0 <b>0</b>
<b>Osmunda Claytoniana</b> (Interrupta). A distinct and very beautiful native species; foliage velvety green, with prominent brown spores in middle of fronds	1.00	3.00	20.00
Regalis (The Royal Fern). Wonderful in damp, marshy places, where its rich yellowish green foliage and golden stems make very striking subjects	1.00	3.00	20.00
Struthiopteris germanica (The Ostrich Fern). A very graceful species with finely cut pinnules, growing 2 to 3 feet high	.85	2.50	18.00
Woodsia obtusa. Large rosettes of curious hoary foliage. Fronds one foot in length; very free growing	.85	2.50	18.00

Variegata. Variegated foliage; blue flow-	2 75	19.00

#### GAILLARDIA - Blanket Flower

Improved English Strain. We consider the Gaillardia one of the most desirable hardy plants in cultivation, and our strain of these brilliant flowered plants to be the finest extant. Though such an ornamental addition to the herbaceous border, the perennial Gaillardia is content with extremely simple treatment. Dig the soil deeply and enrich with well-rotted manure. We recommend the Gaillardia for bedding purposes as well as for borders. Everyone will have noticed how grandly Gaillardias have thriven through droughts; they seem hardly to need water. The gay blossoms are obtainable in perpetual profusion from June to November and the greater the drought and scarcity of other flowers the more the utility of the perennial Gaillardia is demonstrated. No more beautiful and brilliant sight can be imagined than a large bed of Gaillardias, with their profusion of highly colored flowers of all shades. Some of the varieties of our improved strain measure fully 5 inches in diameter.

Three Dazler. Introduced in England two years	Doz.	100
ago. Large, dull red flowers; very fine variety\$1.20	\$3.50	\$25.00
Choicest Mixed Colors	2.50	15.00

#### GALEGA (Goat's Rue).

Showy plants of the easiest culture and very useful in the hardy border. They form very bushy plants with attractive foliage and pea-shaped flowers. Fine for cutting.

				Doz.	100

18.00

Pampas Grass.

Eulalia Zebrina.

Gypsophila Paniculata.

Hepatica.

#### GRASSES (Hardy Ornamental).

The ornamental Grasses can be used with telling effect in borders, large beds, or by the margin of ponds and lakes. They are often used with small shrubs and medium sized trees in wide borders. The Eulalias planted singly on lawns where the soil is deep and rich, take care of themselves and grow very rapidly into large specimens. In large, round beds, with ornamental Grasses as the principal feature, the effect is heightened by the addition of such plants as Cannas or dwarf-flowerering plants near the margin.

Three Doz. 100

Erianthus ravennae (Plume Grass or Hardy Pampas). 10 to 12 feet high, frequently throwing up 30 to 50 flower spikes. Closely resembles Pampas Grass	Elymus glaucus (Blue Lime Grass). Scabra excelsa. A new variety with very rich chrome yellow flowers, turning to a bright yellow as they mature. These are almost double, having from 4 to 5 rows of petals, and are produced very profusely. The plant is about 3 feet high, and from mid-July to the end of feptember makes an effective display .. 1.20 20.00

#### HEMEROCALLIS (Yellow Day Lily).

Hemerocallis have long been favorites in our garden, and are always included in any list of the most popular hardy plants. All of the varieties of Hemerocallis are desirable and beautiful. The tall, graceful, grass-like foliage is very handsome and sets off the charming lily-like flowers very effectively. They look particularly well naturalized along streams or on moist banks, and will thrive most luxuriantly in shade.

Three Doz. 100

Dr. Regel. Handsome, rich orange-yellow flowers in May. Very fragrant. Fine for cutting. 1½ feet .............\$1.00 \$3.00 \$20.00 Flava (Lemon Lily). Sweet scented, clear, full yellow; 2½ feet. Flowers in June. 1.00 3.00 20.00 Florham. 3.00 20.00 Fulva (Brown Day Lily). Coppery orange, shaded crimson. 3 feet. July ....... 2.50 18.00 wanso. #### HOLLYHOCKS - Althea Rosea

The Hollyhock is an old garden favorite, full of sentiment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect, with elegant camellia-like flowers that form perfect rosettes of the most lovely shades of color. They require a deep, rich soil and a sunny corner, but will repay by their gorgeous and lavish bloom all the attention bestowed upon them. Painters choose Hollyhocks as subjects for floral paintings oftener than any other flower. We suppose the reason for this is that artists have a keener appreciation of beauty than other people, and recognize that the common single Hollyhock is one of the most stately, picturesque and beautiful plants in the world. Nothing can be more effective than a large group of single Hollyhocks, and once planted they will literally take care of themselves even if planted in the grass. We know of patches that have not been cultivated or disturbed in any way for twenty years. Some people think double Hollyhocks are more beautiful than single. They are mistaken, although the doubles are beautiful, but inclined to be topheavy. Hollyhocks planted in the Fall will bloom the following Summer.

	Three	Doz.	100
<b>DOUBLE.</b> Separate colors, as follows:			
Apple Blossom	. \$0.85	\$2.50	\$18.00

#### HYACINTHUS CANDICANS.

Twenty to thirty white, pendent, bell-shaped flowers on stalks 3 to 4 feet high. Blooms early and till late Fall. One of the best of all hardy bulbs for the herbeceous border.

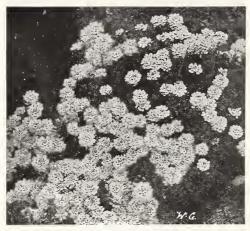

Hibiscus,

Hyacinthus Candicans.

Hypericum Moserianum. Good for foundation planting.

Iberis Sempervirens. Excellent for edging walks.

Incarvillea

#### HYPERICUM (St. John's Wort).

Calycinum. Similar to the other two varieties, except that it is dwarf in growth; makes underground runners, which, when they come up, produce a beautiful carpet of green covered with large yellow blossoms. Is really a ground cover; hardiest of all; excellent	Doz.	100
variety\$1.70	\$5.00	\$35.00
Henryi. The same as Moserianum, though slightly more upright in growth and much hardier and better suited for cold climates	5.300	35.00
Moserianum. A most desirable border plant, of free and graceful habit, producing long, slender, much branched stems, leafy to the base and all drooping towards the ends, apparently from the weight of the flowers and buds, although the flowers face so none of their beauty is lost. It is marvelously free-flowering, of large size, measuring from 2 to 2½ inches in diameter; in color a rich golden yellow, rendered still more effective by the numerous yellow stamens and crimson anthers, and blooms		
continuously the entire season. 2 feet 1.40	4.00	30.00

#### IBERIS (Hardy Candytuft).

Most desirable dwarf plants, 8 to 10 inches, with evergreen foliage, which is completely hidden with dense heads of flowers early in the Spring.

Little Gem. Dwarf, pure white flowers in June. Glaucous blue foliage. Splen-	Doz.	100
did rock or edging plant; perfectly hardy. 6 inches\$1.40	\$4.00	\$30.00
Sempervirens. Very dwarf and covered with a sheet of white, a particularly fine rock plant.  1-year-old plants90	2.75	19.00
2-year-old clumps 1.20	3.50	25.00
INULA (Fleabane).		
Golden Beauty. Free-flowering border plants with yellow flowers	2.50	18.00

#### INCARVILLEA (Hardy Gloxinia).

Large, rich rose, Begonia-like flowers with deep yellow throats, produced all through the Summer. A hardy perennial which succeeds well in borders and is equally valuable for greenhouse decoration. Height 18 inches.

	e Doz.	100
Delavayi. Rose-pink flowers produced in		
large trusses\$1.00	\$3.00	\$20.00

#### IRISES (Species).

Some very interesting sorts are here listed and described; many of them splendid for naturalizing and large, permanent plantings.

plantings.	Three	Doz.	100
Cristata (Evansia). A dainty native creep	)-		
ing species, only 3 inches in height	t;		
flowers rich amethyst-blue; a gem fo			
the rock garden. May	. \$0.90	\$2.75	\$19.00

Tectorum (Evansia). (Syn., Tomiolopha). A rare and beautiful species from China and Japan, with delicately crested flowers of the most beautiful blue. This is the "Roof Iris" of Japan, where it is grown on the thatched roofs of the cottages. This Iris has proved hardy with us, but as the foliage is evergreen, it is benefited and will bloom more profusely if protected with a slight covering of straw. 1 foot. June. (Sold out for this season).

#### IRIS PUMILA

These beautiful little Irises do not grow over 4 inches high, and bloom in April and May. They are fine for bordering flower beds or planting in front of the tall Irises.

Coerulea. Dark violet-blue\$0.90	\$2.75	\$19.00
Excelsa. A splendid pale lemon-yellow 1.20	3.50	25.00
Schneecuppe. A large, showy, pure white90	2.75	19.00

#### IRIS KAEMPFERI (Japanese Iris).

The magnificent Iris Kaempferi belong to the Apogons, and a field of them in bloom is a most gorgeous sight. Seeing them for the first time, one cannot withhold an exclamation of surprise, and having once seen can never forget their striking beauty.

Time to Plant. Latter part of August to the beginning of October is the best time. Late plantings should be protected by a light covering of straw or leaves after the ground is permanently frozen, to prevent roots from being heaved out of ground by frost. In northern sections late planting had best be deferred until Spring, during April and May.

•	Three	Doz.	100
Azure. Double. Immense flower, exquisitely waved; mauve-blue with darker halo surrounding the yellow blotch at base of petals	,	\$4.00	\$30.00
Dominator. Single. Rich indigo-blue with			
narrow white stripes and light center. One of the finest and richest colors	1.40	4.00	30.00

gran	d subject for planting near water,		
wner	e it blooms profusely	2.50	18.00

Iris Kaempferi-Japanese Iris.

Iris Sibirica-Siberian Iris.

German Iris, Lord of June.

Iris Tectorum.

Iris Cristata.

# Iris Germanica (German or Flag Iris)

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it. It throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright after the blossom stalks are removed.

Plant in late August or early September preferably. Spring will do also.

The roots offered in this list are from plants transplanted a year ago and are of a size large enough to bloom next Spring. The collection is up to date and consists of the best and newest

Twenty-five roots at 100 rate, 250 roots of a kind at 1000 rate. We guarantee the usual Wayside Gardens quality. The letter "S" refers to the standards or upright petals; "F" the falls or drooping petals.

#### CHOICE NEW INTRODUCTIONS

Ambassadeur (Vilm. 1920). S. a fascinating smoky velvety purple color; F. velvety purple-maroon; beards and style yellow. A magnificent and regal flower of great substance. 48 inches		
regal flower of great substance. 48 inches	Each,	\$1.75
Ballerine (Vilm. 1920). Pall. S. light blue-violet, broad and waved at the margin; F. a deeper shade; sweetly scented. A splendid, tall, stronggrowing Pallida form. 36 to 48 inches	Each,	\$2.50
Cecil Minturn (New). Soft Cattleya rose. A beautiful flower with broad petals, gracefully waved and crinkled; one of the finest Irises for size and extreme beauty	Each,	\$0.75

ty; fine for cutting	1.00	3.00	20.00
Viscaria splendens. Brilliant red	.90	2.75	19.00
Viscaria splendens alba. Flowering pro-			
fusely in June and July; it is one of the	•		
best white flowers at that time of the	>		
year. 8 to 10 inches high; fine border			
plant	.90	2.75	19.00
VCIMACUIA (Loococtrifo)			

#### LYSIMACHIA (Loosestrife).

LIBIMACIMA (Essections).			
Clethroides. Long, recurved spikes of pure white flowers, from July to September. A desirable variety. 2 feet	1.00	3.00	20.00
<b>Portunei.</b> A neat variety, growing about 18 inches high, with dense, upright spikes of white flowers in August	1.00	3.00	20.00
Nummularia (Creeping Jenny or Moneywort). Valuable for planting under trees or shrubs where grass will not			
grow	.85	2.50	18.00

Lysimachia Clethroides.

Linum Narbonnense.

Lychnis Chalcedonica.

Lychnis Viscaria.

Lilium Auratum.

Likes a cool, moist spot in the garden.

Lilium Candidum.
Plant with Delphiniums for a fine effect.

Lilium Canadensis.

# Lilies Hardy Garden Varieties

Noble and beautiful flowers which are too frequently strangers in American gardens. It is always with a touch of sadness that we note the infrequency of Lilies in American gardens. No flower, it seems to us, is at once so noble and so beautiful. Nor is there lack of variety. Furthermore, the Lily is singularly valuable for its charming effect on the skyline of the garden when in bloom.

There is a notion that Lilies are "hard to grow." Some of the rarer species are, it is true; they not only stubbornly refuse to make themselves at home in the garden, unless conditions are precisely to their liking, but some of them cannot endure the northern Winter without the necessary covering of litter, which many other tender plants require. Unless one goes in for Lilies to the extent of making a hobby of them, however, these can all be left to the collector and there will be quite enough species remaining to give one a Lily season in the three months' duration of which loveliness follows loveliness with breaks of only relatively brief length. We say species for the reason that the Lilies in cultivation show an exceptionally low percentage of hortcultural varieties. Possibly because Nature made every species perfect to begin with, the hand of the hybridizer has been loath to endeavor to "paint the Lily," as it were.

The varieties which we offer in these three pages are such as have, with us, withstood the Summer's drought and the severest of Winters, and have thus proven themselves worthy of a place in your garden.

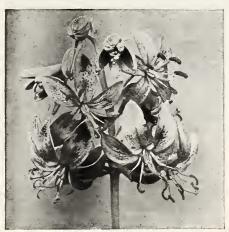

DELIVERY—This depends upon the arrival of the bulbs from our foreign sources. Many get here too late for Autumn planting, thus necessitating carrying over the bulbs until Spring. Those marked (\*\*) should be planted in the Fall only; those marked (\*) may be planted in Spring or Fall, preferably the latter; all the others are for Spring delivery.

Auratum (Golden-Banded Japan Lily). Undoubtedly one of the finest. Its large graceful, fragrant flowers are composed of six petals of a delicate ivory-white color, thickly studded with chocolate-crimson spots and striped through the center a golden yellow; 3 to 5 feet. July to September.	Each	Doz.	100
Large bulbs	0.55	\$5.50	\$40.00
Mammoth bulbs	.70	7.00	50.00
Auratum platyphyllum. Also called "Macranthum." This is a robust growing form; the stem is stouter and attains a greater height; the leaves are much broader; enormous flowers, white, richly spotted yellow. Undoubtedly the choicest of all.			
Large bulbs	.55	5.50	40.00
Mammoth bulbs	.75	7.50	55.00
Auratum rubro vittatum. Similar to the above but the flowers are dark rose-pink.	1.00	10.00	75.00
Auratum pictum. Is another splendid form of Auratum and fertunately a strong grower	.75	7.50	55.00
Batemanni. Strong stems with five to ten flowers of a reddish orange color. July-August. 3 to 4 feet	.40	4.00	30.00
Browni odorum. A vigorous grower with large, trumpet-shaped flowers of clear white, veined outside with purplish	0.0	9.00	C= 00

Colchioum (Scovitzianum). A beautiful lemon-yellow Lily, produced in pyra-		100
midal clusters of drooping, waxlike flow- ers. June. 4 to 5 feet\$1.2	5 \$12.00	\$85.00
*Davuricum. This beautiful Lily comes from the home of L. Tenuifolium in Siberia. It resembles a native Philadelphicum. It is of easy culture, grows two or three to five upright scarlet flowers, dotted black	0 2.75	18.00
Giganteum (Himalayicum). 5 to 7 feet. July and August. Most majestic of all the Lilles. White, fragrant, funnel- shaped flowers	0 <b>(Ba</b> r	•)
Hansoni. Most desirable; not particular in its cultural requirements and extremely handsome in flower; does well in light loam. Plant among shrubs and low plants to protect young shoots, this being one of the earliest Lilies to appear in the Spring. The stem reaches a height of 4 to 5 feet, carrying blossoms 2 inches across, regularly reflexed, the petals being of a bright orange spotted more or less with brown, of a waxy texture. Admirable for pot culture. June flowering	0 6.50	50.00
*Henryi. A new Japanese Lily that has	0 0.30	30.00
made a sensation in Europe. It has the same form and appearance as the Speciosum varieties, but the flowers are bright orange-yellow. We grow this variety now ourselves from seed. They are as hardy as a tree. Shipment October 1st		
to May 1st	6.50	50.00
Krameri. Unique for its color and grows from 2 to 4 feet high. The funnel-shaped, finely formed flowers are 6 inches or more in length and as much across, of a beautiful clear pink color, often shaded blush		
	10 4.00	30.00
*Martagon (Dalmaticum, Turk's Cap Lily). A handsome Lily, bearing clusters of purple, waxlike flowers. Thrives best in partial shade. June. 5 feet	4.00	30.00
Pardalinum (Leopard Lily). Flowers reflexed, bright yellow at base, spotted brownish purple, remainder orangescarlet. 3 to 4 feet. July and August3		
scarlet. 3 to 4 feet. July and August3	3.00	20.00
Philadelphicum. A handsome native Lily with yellow, cup-shaped flowers, spotted maroon and shaded orange at ends of petals. Good for naturalizing. July. 3 feet. Large bulbs	3.00	20.00
Pomponicum. A brilliant red Turk's Cap Lily, Much like Chalcedonicum, but with		
the heads of flowers rather more loosely arranged. June. 3 to 4 feet	7.50	60.00
Pyrenalcum (Yellow Turk's Cap Lily). A Lily of easy cultivation, with many small, yellow flowers, dotted brown. Re- flexed petals. June. 3 feet	6.00	45.00
*Regale or myriophyllum (The Regal Lily). It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink, with a beautiful shade of canary-yellow at the center, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the Jasmine, and lacking the heavy, oppressive odor of most Lilies. Blooms out-of-doors early in July. Flowering Size. Strong bulbs

## PAPAVER - Poppy

The proper planting season for Oriental Poppies is during the last of August, September and October. Roots planted at any other time we do not guarantee to live.

Oriental Poppies are the regal representatives of this popular genus, growing 3 to 3½ feet high, and far surpassing in splendor of bloom all the annual and biennial kinds, and for a gorgeous display of rich and brilliant coloring nothing equals them during their period of flowering in May and June, and whether planted singly or in masses their large flowers and freedom of bloom render them conspicuous in any position. They are of the easiest culture; almost any kind of soil suits them, but they do best in deep, rich loam. Set the plants out in the Fall or early Spring before the first of May—give them water occasionally during dry spells in the early part of the season. Mulch with stable litter in the Fall; and they will increase in size and floriferousness for several years. We offer the best of the latest introductions, as well as the distinct standard varieties.

Orientale (Oriental Poppy). Tremendous scarlet, cup-shaped blooms of brightest crimson-scarlet, with large, purplish black blotches at base of petals, creating a wonderful contrast when bloom is fully open. Clumps of these throughout the border add a brilliancy that no	Doz.	100
other flower can provide\$0.90	\$2.75	\$19.00
Orientale, Apricot Queen. Large, apricot. 1.00	3.00	20.00
Orientale, Beauty of Livermore. Crimson, with black blotch; fine flowers 1.00	3.00	20.00
Orientale, Mrs. Ferry. Orange-apricot; very fine	3.00	20.00
Orientale, Perry's White (New). The most distinct break in Oriental Poppies that has yet been made; the flowers are a fine satiny white with a crimson-maroon blotch at the base of each petal. (Sold out until next season).		

## PAPAVER NUDICAULE (Iceland Poppy).

PHYSOSTEGIA (False Dragonhead). Virginica. Forms large clumps 3 to 4 feet high, bearing long spikes of delicate pink flowers, tubular in form. July and August

Virginalis alba. Pure white .....

The plant is of neat habit, forming a tuft of like foliage, from which soring throughout a profusion of slender, leafless stems 1 foot with charming cup-shaped flowers.	the entire season,

Papaver, Mrs. Perry. The best of all the pink Poppies.

Pentstemon Digitalis. Does well in poor ground.

Papaver Nudicaule.

Couronne d'Or.
One of the best late white varieties.

Duchesse de Nemours.

# **Peonies**

The varieties we offer are arranged alphabetically, and where known, the name and date of the introducer immediately follows in parentheses. As color comes first in the choice of Peonies, we have placed the color on the same line as the name. Size and type naturally appeal next, and so follow the color. Having found these satisfactory in any variety described, one naturally next looks for the character and habit of the plant. To further aid purchasers we shall be pleased to give by letter further information to intending purchasers.

Figures following name indicate rating by American Peony Society.  $\,$

arl Rosenfield. 8.8. Very large flower; globular, semi-rose type. Extremely vigorous grower, tall, and free-flowering. As an early red it has no equal ...\$1.50 Karl Rosenfield.

Kelway's Glorious. 9.8. Flowers large, full, double rose type; cream-white, overlaid with a soft blush of rose; very exquisite; fragrant; late midseason. Considered by many as the finest of Kelway's Peonies. (Sold out for this season)

Lady Alexandra Duff. 9.1. Delicate pale pink fading to white. Main flower large, cup-shaped, rose type. Blossoms form side buds often semi-double, exposing the anthers; fragrant

e Cygne. 9.9. Very large, perfectly formed flower, freely produced; creamwhite with a touch of green at the heart. The finest white. Received the highest rating of any Peony. (Sold out for this season).

Mme. Crousse. 7.9. Pure white with faint crimson markings. Large, globular, crown type; fragrant; medium height.

Madame Ducel. 7.9. (Mech., 1880). Large, globular, typical bomb. Light mauve-rose, 1 (153), with silvery reflex. Fra-grant. Strong grower, medium height; very free. Extra

Mme. Emile Galle. 8.5. (Crousse, 1881). Very soft pink, changing to milk-white in center. Very large, compact, flat, rose type; tall. strong, fragrant. Late ....

Mme. Forel. (Crousse, 1881). Enormous, very full, double bloom; color glossy, deep pink with a silvery reflex; known as the "Princess of Pink Peonies," a title it well deserves and proudly carries. Extra fine Extra fine

Mile. Leonie Calot. 8.1. (Calot, 1861). Very delicate shell pink, center darker. Medium size, very compact, globular; on weak stems. Late midseason .......

Marguerite Gerard. 8.4. (Crousse, 1892). Very pale salmon-pink, fading to almost white. Large, compact, rose type; very strong growth. Late ..........

arie. 8.5. (Calot, 1868). Lilac-white fading to milk-white. Medium size, compact, rose type; fragrant; very tall. Very late arie. 8.5. fading to

Modeste Guerin. 7.8. (Gr., 1845). Large compact, typical bomb. Uniform solfer-ino-red. Fragrance XX. Medium height; extra strong; free bloomer. Midseason. Extra good variety .....

Mons. Dupont. 8.3. Very large, cup-shaped flower; ivory-white; center petals splashed with carmine. The golden stamens show at the base of the petals; fragrant; a strong grower; very tall; midseason. (Sold out for this season).

Mons. Martin Cahuzac. 8.8. Medium sized, globular, semi-rose type. Dark purplegarnet with black reflex. The darkest Peony known. Strong, vigorous grower, free bloomer; midseason ........... 2.50

Martha Bulloch (Brand, 1907). Mammoth cup-shaped blossom often 9 to 12 inches across. The largest of the good Peonies. Deep rose-pink in the center, shading to silvery shell-pink in the outer petals. Stalks strong and erect. (Sold out for this season).

Mad. Crousse.

Festiva Maxima.

No garden complete without this white Peony. We consider it the best all around white kind in cultivation.

Japanese Peony.

### NEW JAPANESE PEONIES

A type not very generally known, but in every community, wherever established, is awakening great interest and enthusiasm. The opened flowers are of extra wide spread, with one or more layers of broad guard petals which act as a cup to the mounded center. In place of the pollen-bearing stamens which center the Single Peony flowers, in this class the stamens and anthers are greatly enlarged into narrow, thick, twisted petaloids of various colors, forming a dense cushfon. We heartily recommend our list to those who want something different from the other fellow's; and to Peony planters generally, as types which will add zest and beauty to their gardens.

gardens.

No. 6. Gunpoo-no-nishiki. All-over violet rose, lower petals striped with white; full crown center\$	6.00
No. 11. Yoochi-no-tsuki. Six- to eight-inch flowers with prominent cushion center; white, occasionally flushed pink, with amber cream petaloids	5.00
No. 15. Fuyajo. This is the darkest, richest and most distinctively Japanese of our group. Broad rounded guards of dull—although velvety—mahogany. The fine, curly petaloids form a conspicuous, dense center; garnet, streaked on reverse side and heavily tipped with light bronze	0.00
No. 20. Fuji-no-mine. A very large and free-blooming sort; white, with rich cream center	6.00
No. 42. "Rose of Nippon." A wonderfully free bloomer, a persistent mass of brilliant 6-inch flowers. Very deep rose, the broadly prominent center darkened by carmine, and illuminated by countless starpoints of both silver and gold. Many centers are slightly tufted	5.00
No. 88. Oki-no-nami. Tall, free-flowering and showy. Pale hydrangea-pink; with full, fine-cut center of peachpink and cream. It does not require a strong imagina-	7.00 5.00
no. 135. Kara-ori-nishiki. This shows uniquely fluted petals, with ends deeply indented. These are white, irregularly streaked and tipped with lilac-red. The center is medium sized, but bright with deep gold filaments, and carmine seed pods	5.00

## **PHLOX**

## PHLOX DECUSSATA (Hardy Phlox).

Perennial Phloxes succeed in almost any soil enriched with manure in Spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over, they will produce a second supply of flowers, continuing the display until late in Autumn. These later blooms are often finer than the first.

## PRIMULA - Hardy Primrose

Splendid little plants for naturalizing near shrubs, in the border or shaded nooks on the rockery.

or shaded nooks on the rockery.		
"Ailin Aroon." Another cross between pulverulenta and Cockburniana; flowers	Doz.	100 \$45.00
light scarlet\$2.00	\$0.50	\$40.00
Auricula alpina. One of the treasures of the rock garden. The growth is very attractive, forming rosettes of thick leaves, sometimes farinose or mealy. From these rosettes the flower stalks rise to a height of six or eight inches, bearing heads of bloom of various colors and exceedingly fragrant	3.50	25.00
Bulleyana. A beautiful species from Yunnan. Flowers rich golden yellow, shaded orange-buff, borne in whorls on stiff		
stems. 2 feet 1.40	4.00	30.00
Cashmeriana (New). Large, globular heads of a pleasing purplish blue shade; prefers a moist shaded situation 1.40	4.00	30.00
Cortusoides. A distinct Siberian species, with soft, wrinkled heart-shaped leaves. Flowers in early Summer, deep rose. Prefers light, rich, well drained soil, in a sunny position, in border or rockery; 10 inches	4.00	30.00
Moerheim Hybrids. A new strain of Hardy Primulas with the constitution of P. japonica, resulting from crossing of several. Colors range from cream to many shades of yellow, orange, purple, lilac, pink and crimson. They are very hardy and prefer a half-shaded position that is fairly moist; very unusual 1.20	3.50	25.00
Pulverulenta. Rich crimson in color, in whorls, on stems 3 feet high. One of the finest varieties	4.00	30.00

## POLYANTHUS (Bunch Primrose).

The Polyanthus is an indispensable Spring flower and should be used largely in flower beds and borders, also wild gardens and rockeries. It likes an open, half-shady position in rich soil and under such conditions will bear flower stems a foot high.

nign.		
Three Exhibition Blue. A very beautiful strain,	Doz.	100
having flowers from deep to light blue\$2.00	\$6.00	\$40.00
Exhibition White. A very fine, large-flowered pure white, with striking yellow eye	6.00	40.00
Munstead Strain. In shades of yellow, from cream to dark orange, selected and perfected by Miss Jekyll of England. 1.40	4.00	30.00
Pink and Red Shades. Very handsome, ranging from light to dark red, with yellow eye	4.00	30.00
Veris Hybrids. This strain includes various shades of lilac, purple and violet, as well as a wide range of buff, orange, salmon and rich reds approaching scarlet in intensity. Quite hardy and of		
vigorous growth 1.20	3.50	25.00

## POTENTILLA (Cinquefoil).

Charming plants for the border, with brilliant single or double flowers that are produced in profusion from June to August. Succeeds in any soil. 18 inches.

Mixed	Colors	of	Double	Varieties	Three\$0.90	100 \$19.00

### PRUNELLA (Self-heal; Heal-all).

Grandiflora. Violet or purple flowers all Summer. Fine for the rockery or slightly shaded parts of the hardy border. Succeeds in any soil not excessively dry. 1.00 3.00 20.00

Primula Auricula.

Primula Vulgaris.

Primula Veris Polyanthus-Bunch Primrose. Hardy Variety.

Pyrethrums.

Salvia Azurea.

Saponaria.

<b>PYRETHRUM</b> (Persian or Painted Dais	v).
---	-----

The Pyrethrums are so simply and easily cultivated that they may be recommended to all who possess a garden. They are perfectly hardy and absolutely invaluable for cut flowers through the Summer and early Fall. The flowers are bright and elegantly borne on long stems; most convenient for decoration. The single-flowered varieties are veritable colored Marchrysanthemum-like, and as their chief beauty is in the months of May and June, they may well be designated Spring Chrysanthemums, possessing the advantage over the Chrysanthemums of being able to withstand the severest Winter without protection. The single-flowered varieties are variable colored Marguerites and possess a range of color and hardiness that Marguerites might envy in vain. Nothing can surpass the Pyrethrum in profusion of flowers throughout the entire Summer from May to July, and the blossoms are not injured by storm or sun. As a cut flower, their long stems make them ideal for decorative purposes. Their position should be in Three Dor.

Stokesia Cyanea.

Tradescantia Virginiana.

Trillium Grandiflorum.

Thalictrum Aquilegifolium.

## STOKESIA (Cornflower Aster; Stokes' Aster).

A most charming and beautiful native hardy plant which, for many seasons, has been the most admired flower on our grounds. The plant grows from 18 to 24 inches high, bearing freely from early July until late in October, its handsome lavender-blue centaurea-like blossoms, which measure from 4 to 5 inches across. It is of the easiest culture, succeeding in any open, sunny position, desirable as a single plant in the hardy border and effective in masses or beds of any size.

TRITOMA (Red Hot Poker; Flame Flower	; Torcl	h Lily).	
Pfitzeri (The Everblooming Flame Flower). The free and continuous blooming qualities of this variety have made it one of the great bedding plants, and when we consider that there are few flowering plants which are suitable for massing under our severe climatic conditions it is little wonder that such an elegant subject should become so popular. Succeeds in any ordinary garden soil, but responds quickly to liberal treatment. Hardy if given protection, but the most satisfactory method of wintering is to bury the roots in sand in a cool cellar. In bloom from August to October, with spikes 3 to 4 feet high, and heads of bloom of a rich orange-scarlet producing a grand effect either planted singly in the border or in		Doz.	100
Perry's Unnamed Hybrids. These are seedlings of various colors, ranging	\$1.20	\$3.50	\$25.00
from pale yellow to deep orange and are very showy in a hardy plant border  Quartiniana. A strong growing, thick-stalked variety, blooming late in May with flower cones 10 to 12 inches long. Orange-red at first, but yellow on bottom half as bloom matures. Perfectly hardy here; does not need protection		3.00	20.00
Uvaria grandiflora, 3 to 4 feet. The old-		3.50	25.00

## EUONYMUS (Evergreen Bittersweet).

The trailing Euonymus are particularly desirable for their dense, evergreen foliage and extreme hardiness, some varieties on account of this taking the place of the English Ivy for wall covering, others that of the boxwood as an edging plant. Makes a splendid ground cover, and one of the best creepers for rockeries.

Carrieri (Carrier's Evergreen Bittersweet).
A stronger grower than Euonymus radicans, with larger ovate green leaves.
Half bush and half vine in habit of growth. If given support, it makes a very fine covering for a building or a wall; very rugged and a rapid grower, which may be used for evergreen hedges, as it can be sheared into any shape ...\$4.00 \$30.00 \$289.00

1.40 4.00 5.00 adicans acuta. A strong growing variety with long, narrow, dark green leaves veined with grey; excellent as a ground cover or for wall covering ......... Radicans acuta. 6.00

Radicans variegata. A beautiful small-leaved green and white variegated form of the same habit as the type ...... 1.70 

## ENGLISH IVY (Hedera).

The famous English Ivy with its familiar evergreen, glossy foliage is unfortunately not very hardy in this climate, and requires Winter protection where it is exposed to chilly winds on open walls. It can, however, be planted with perfect safety as a ground cover or as an edging to flower beds.

Three Doz. 100 \$35.00

\$35.00 7.00 50.00

## LONICERA (Honeysuckle).

Their vining qualities are all that can be desired, but the fra-grance of their flowers makes their strongest bid for favor. Each Three Doz.

\$1.20 \$3.50

#### POLYGONUM (Silver Lace Vine).

Aberti. A splendid hardy climber, of strong, vigorous growth, attaining a height of 25 or more feet, producing during Summer and Fall great foamy sprays of white flowers, and a well established plant during its long period of flowering is a great mass of bloom.

### PUERARIA (Kudzu Vine).

The most rapid growing vine in cultivation, often attaining a growth of 40 feet in a single season. Especially desirable for immediate effect for dense shade, as its leaves are large.

Each Three Doz.

Thunbergiana (Jack-and-the-Bean-Stalk).
Small, pea-shaped, rosy purple flowers,
heart-shaped leaves. It will grow anywhere. Field-grown plants ........\$0.50 \$3.50

### WISTERIA.

Woody vines with tightly clinging habit, for pergolas, arbors, trellises, etc., especially ornamental in early Summer when they are resplendent with their large, drooping clusters of fragrant blossoms.

Bunches of \$2.00 \$6.00 2.00 6.00

Clematis Jackmani.

Wisteria Sinensis.

# Hardy Shrubs and Azaleas

For the Hardy Border or Rock Garden

Azalea Mollis.

Cotoneaster Horizontalis.

## HARDY AZALEAS

The varieties here offered are the hardiest and most desirable for general garden planting; until thoroughly established it is beneficial to give them a heavy mulch of leaves during the Winter, and a loose covering of evergreen branches to protect them from the sun and drying winds during freezing weather.

AZALEA (Pinxter Flower; Swamp Honeysuckle).	D.
Amoena (Japanese Evergreen Azalea). A dwarf shrub with double purplish red flowers in May; is especially adapted for borders and rock gardens; needs some protection in northern latitudes. Should be planted in sheltered positions and will abundantly repay for any care given it\$2.00	<del>-</del> -
Hinodegiri. Bright fiery red flowers. Bushy plants	
10 to 12 inches high 1.50	18.00
Hinomayo. A wonderfully pleasing shade of delicate rose-pink. Bushy plants 10 to 12 incheshigh	18.00
specimens, 18 inches high 5.00	
Macrantha. Very late-flowering large salmon-red. Bushy plants, 10 to 12 inches high 1.50	18.00
Maxwelli. Large single carmine-red of dwarf spreading habit. Bushy plants, 8 to 10 inches	
high 1.50	18.00
Mollis (Japanese Azalea). Of dwarf habit; resembles rhododendrons; good foliage; flowers in all shades of red, yellow and orange; perfectly hardy, thriving in sunny positions anywhere. Excellent for mass planting. It must not come in contact with barnyard manure	18.00
Yodogawa. Large semi-double lavender-plnk flowers; the earliest to bloom. Bushy specimen plants, 24 inches high	

## HARDY SHRUBS

Varieties Used With Herbaceous Plants in Hardy Plant Borders and Rock Gardens

The few varieties listed below are used to mix with hardy

plants in borders and rock gardens.	(0 1111	x with	nai ay
BUDDLEIA (Summer Lilac).			
Farquhari (New). A low-growing pendu- lous, spreading shrub, with rich green foliage and silvery reverse, bearing in late Sunnmer long racemes of purple	Each	Three	Doz.
flowers  Variabilis magnifica (Butterfly Bush).  This is properly a shrub, but the top usually freezes back, and new growth starts from the root like other perennials. Plants grow three to four feet and are covered with long racemes of lilac-like flowers in July. The best location is in good, rich, well drained soil in a sunny situation	.75	\$2.00 2.00	\$6.00 6.00
	. 10	2.00	4.50
CARYOPTERIS (Blue Spirea).			
Mastacanthus. A handsome hardy perennial; grows about 3 feet high and produces rich lavender-blue flowers in great profusion the whole length of the branches. A valuable plant either for bedding or pot culture, blooming continuously from early in September until cut by frost	.75	2.00	6.00
COTONEASTER (Rock Spray).			
Horizontalis (Prostrate Cotoneaster). A low shrub with almost horizontal branches. Native of China. Leaves dark green, about half an inch long; flowers pinkish white; fruit bright red; attractive in rockeries. A most desirable ground cover, and should be largely planted. Cannot be transplanted unless			
from pots. Strong, 5-inch pot plants	1.25	3.00	10.00

DAPHNE (Garland Flower).	Doz.	100
Cneorum. Handsome dwarf sub-shrubs; excellent for planting near front of shrubberies, with odorous pink flowers and handsome foliage. Large clumps\$2.50		
DESMODIUM (Tick Trefoil).	<b>¥</b> -0.00	
Penduliforum. An exceedingly graceful shrublike plant covered with purplish red flowers in Summer time. Strikingly beautiful	5.00	35.00
ERICA (Heath).		
The Heaths are compact, low-growing plants, a extremely useful for rockeries. The small fol arranged around the wiry little stems, and eith bloom or in midwinter makes a very pretty some protection the first Winter. Semi-shady our Ericas are strong, bushy plants.		densely in full Give n. All
Elata alba (White Heather). The nodding white flowers are the only diversion from the Vulgaris; a pleasing contrast.	1002.	100
	\$10.00	
Nana compacta. Dwarf and compact; pink. 9 inches. Big clumps 1.00	10.00	
Vulgaris (Scotch Heather). A dense- growing shrub, with erect branches, covered with short, closely adpressed leaves. The pretty, bell-shaped flowers occur in great profusion toward tops of the shoots and are a pretty rosy color. Big clumps	10.00	
HYPERICUM (St. John's Wort).		
Three	Doz.	100
Calycinum (Aaron's Beard). Rapidly growing sub-shrub and ground cover in sun or shade, with golden yellow flowers.  1 foot. July-August	\$5.00 4.00	\$35.00 30.00
· ·	5.00	35.00
LEUCOTHOE. Each	Doz.	
Catesbaei. Large. A valuable plant with oblong, shiny foliage, dark green in Summer, turning to a bronzy red in the Fall. The fragrant white flowers are borne in pendulous racemes. Adapted for woodland planting		
	\$10.00	
VITEX (Chaste-tree; Hemp-tree).  Macrophylla. In general habit similar to V. Agnus Castus, but much stronger in all its parts, the foliage being larger while the trusses of lavender-blue flowers are fully double the size. It blooms from July to September; as popular as the Butterfly Shrub, to which we consider it superior	10.00	
HEDGE PLANTS		
BERBERIS (Barberry).  Doz.	100	.1000
Thunbergi (Japan Barberry). Where a dwarf deciduous hedge is wanted, nothing equals this beautiful Barberry. Requires but little pruning to keep in shape. The leaves are small, light green, and towards Fall assume rich,		

We are glad to be able to offer this valuable shrub again and at a price everyone can afford. The Boxwood we are offering are being grown for us by a Dutch expert in New Jersey. The stock we offer is bushy and wide, excellent for edging walks or beds. Contrary to the usual idea, Boxwoods are hardy and will stand a temperature of 10 below zero without any damage, providing the plants are protected with a little lath screen. admitting air and light, but giving enough shade so that the sharp sun during the months of December, January and Febuary, does not burn the foliage. Grows in any soil. Plant six inches apart.

6 to 8 inches high ...... 4.00 30.00 280.00

Erica-Heath.

Hypericum.

Barberry Hedge.

# Bulbs for Hardy Border and Rock Garden

OCK GARDENING, during the past few years, has become very popular. Being the greatest producers of rock plants in this country, we have naturally been getting a great many requests from our customers to supply them with certain varieties of bulbs that might be suitably used in rock gardens. Unfortunately, the exclusion of Narcissi from this country has taken away from us one of our most valuable varieties of bulbs for this particular form of gardening! All tiny Daffodils, such as Narcissus Bulbocodium, commonly known as the Hoop-Petticoat Daffodil; Narcissus Triandus Albus, known as "Angel's Tears;" Narcissus Cyclaminenus, or the Cyclamen Daffodil; Narcissus Moschatus, etc., and many others are being used in Europe in all rock gardens. However, we are still able to obtain the Wild Crocus, and Wild Tulip species, and other small bulbs such as the Muscari, Scillas, Snowdrops, Fritillarias, etc. On page 64, for instance, you will find two very good collections of Wild Crocuses listed. One collection consists of varieties that bloom in the Fall during the months of September and October, while the other collection consists of early Spring-flowering varieties, blooming wherever possible in February or March.

Spring-flowering varieties, blooming wherever possible in February or March. Do not confuse these Wild Crocuses with the well known Dutch varieties. These we do not like to plant in rock gardens, but suggest their use for edging or planting in the lawn only.

like to plant in rock gardens, but suggest their use for edging or planting in the lawn only. Crocus Imperati, Zonatus, Speciosus, Tommasinianus, etc., are great favorites with everyone familiar with rock gardening. Crocus Speciosus, Sativus and Zonatus, for instance, if planted between low-growing varieties of Sedum or Thyme, create a striking effect in October when flowers in rock gardens as a rule are rather scarce. It should be borne in mind, however, that in order to have success with these Wild Crocuses, especially Autumn-flowering varieties, they should be planted immediately upon arrival.

Tulip species, such as Tulipa Persica, Sylvestris, Clusiana, are a delight to watch when they

put in their appearance early in April.

Erythroniums or Dog-tooth Violets, in varieties, are natives of this country, and we have made provisions to produce them on our own nursery so that we may be able to take care of the growing demand for these bulbs. There are, of course, innumerable varieties of semi-bulbous plants, such as Trilliums, Corydalis, Mertensias, etc., these can all be found in our hardy plant section.

## The Hardy Border Is Not Complete Without Bulbs

Bulbs for the hardy border consist of a greater number of varieties than those that are suitable only for the rock garden. We do not believe the hardy plant border is complete without a liberal planting of Darwin, Cottage and Breeder Tulips, Narcissi and other bulbs. The most practical way to go about planting these bulbs in the border is to plant them under dwarf, shallow-rooting herbaceous plants. For instance, all varieties of Thyme and dwarf Sedums are excellently planted right over Tulips. There are also several varieties of Veronicas such as Veronica Rupestris, Amethystina, Royal Blue, True Blue, and several more, which will live in perfect harmony with bulbs. The Tulip or Daffodil bulbs which are planted underneath these dwarf herbaceous plants will last for a great many years.

## Ground Covers Require Special Care in Selection

We have also often been asked to suggest ground covers for planting between Tulips, in beds, and in regular bulb gardens. We have noticed in several bulb catalogs information in regard to material of that sort which is rather misleading and impractical because of climatic conditions. Planting ground covers between bulbs is greatly in vogue in England, because it is not necessary to cover bulb beds in England with any straw or manure to protect them through the Winter. There are, of course, localities in the United States where this is not necessary, but in any state where the temperature drops to ten degrees above zero, it is essential that bulbs be protected in order to get the best results. Therefore, the planting of ground covers such as Arabis and Forget-me-nots, which are the two most popular plants used, is always more or less dangerous, because neither of these two plants like a very heavy covering during the Winter.

Viola Cornuta, especially, makes a very fine ground cover, but if the Fall growth of these plants is damaged by a heavy covering, you will not get any blossoms at the time your Tulips are in bloom, therefore entirely defeating the purpose they were intended for. There are, of course, several more varieties of plants which can be used for ground covers or which may be planted in conjunction with bulbs. To anyone interested in carrying out an idea of this sort, we suggest they write us, so that we may recommend suitable material for this purpose in their

respective locations.

## The Use of Lilies in the Rock Garden

Lilies, particularly, have been grown successfully in hardy plant borders, but we recommend three varieties that may be used in rock gardens, and these are Lilium Tenuifolium, Rubellum and Krameri. All three are dainty, and are best planted in rock gardens where they can be given a sheltered location. All other varieties are splendid material for the hardy plant border.

# Bulbs of the Highest Quality for 1926

## IMPORTED TO ORDER ONLY

# Darwin Tulips

The Darwin Tulips were developed in the north of France, supposedly from choice varieties of Bybloem Tulips. Owing to the unusual clearness of the colors, to the substance of the petals, and to their vigorous growth, these seedlings, when they came into the hands of the prominent Dutch firms, seemed worthy of forming a new class of Tulips. In 1889 they were named in honor of Darwin, and offered for sale. They remained little known for a number of years but with the renewed interest in the Tulip, which sprang up in England at the beginning of the present decade, they commenced to receive attention. In America the Darwins are now widely appreciated, and their popularity here promises to exceed the favor they have enjoyed so long in Europe.

The colors include the brilliant scarlets and crimsons, and the more somber tones of red. The shades of rose and pink, of violet, and purple are unsurpassed for their delicacy or their richness of color. There are slate blues and blue-violets which might almost be called blue, while Dumas' "Black Tulip" is very nearly realized in some of the dark maroon varieties. There are no yellows. All the bronze and buff tones are Breeders; while bright yellow and orange-scarlet must be sought among the Cottage Tulips. The Darwins may be left undisturbed for two years, but it must be kept in mind that Tulips are not long-lived in our soil and climate, but it faken care of, we have known them to last ten years. The collection offered in this catalog is made up from the best varieties offered for sale in Holland. All have been tested at Wayside Gardens and we stand behind each one of them.

The figures following the name indicate the relative time of flowering.

*Europe. 2. Salmon-scarlet, shaded rose with white base; medium sized flower on strong stem. Height 22 inches	.65	5.50
*Euterpe. Silvery lilac with rosy tone; dainty, coy, incurving of the edges of its outer petals. This charming variety makes a beautiful bed planted with

Darwin Tulips Planted With Lily-of-the-Valley.

# Famous Old Dutch Breeder Tulips

The Breeder Tulips have been favorites in Holland for centuries, but it is only within recent years that they have become known and appreciated in America, and now they bid fair to rival the Darwin Tulips in popularity. Their majestic size and remarkable colors place them distinctly in a class by themselves. Every lover of the more somber shades cannot fail to revel in the rich and artistic blendings of purple and old gold, bronze and terra cotta, brown and violet, and buff and maroon found among the Breeders. They are late to bloom but surpass in size and vigor the Darwins, although lacking the color brilliancy of the latter. The flowers are, many of them, sweet scented, and all splendid for cutting, as they retain for a long time their form and color.

## Choice Mixed Breeder Tulips

Mixed bulbs, as a rule, do not appeal to the planter of bulbs because it does not make possible the blending of colors. Breeder Tulips, however, are in a class by themselves and their colors do permit easy blending. They are in shades of bronze, golden bronze, violet, buff, maroon and terra cotta. We suggest a liberal planting for cut flowers.

\$1.00 per 10; \$9.00 per 100; \$85.00 per 1000.

# Cottage or May-Flowering Tulips

The Cottage Tulips come into bloom in early May, after the Early Single varieties have passed. They are hardy and robust, with long, slender, but very stiff stems. The flowers are mostly long and oval, many of them with the petals gracefully reflexed. The Cottage Tulips as a class are rich in the more delicate and artistic shades of yellow, orange, and fawn with salmon, old rose and amber. They are the best of all Tulips for cutting and they develop best when planted outdoors, including the earlier kinds.

1	10 Bulbs	100 Bulbs
Bouton d'Or. The finest and deepest golden yellow Tulip with black anthers. Cupshaped flower of medium size; splendid for cutting and for mass effect; if planted amongst blue Anchusa myosotidifora, or have them rise in quantity from a solid bed of white Violas or Arabis, they will make a striking picture. Very effective also if massed against evergreens or lilacs. Height 20 inches		\$4.50
		ψ1.50

# Late Orders!

Always state on your order blank if we are allowed to give you a similar variety of bulb if we are sold out of the kind you order. We of course will send you a color as closely resembling the one you order as possible and of the same price.

Parrot Tulips

We urge you to grow some of these quaintly shaped flowers particularly for house decoration. The artistic forms and colorings make them especially suitable for cut flower purposes; in the garden, if planted in borders or groups, they are not always satisfactory, as they lack the vigorous, straight stems of the other Tulips with the exception of one variety, the beautiful novelty "Fantasy" which has as straight and tall a stem as a Darwin Tulip. All Parrot Tulips are extremely effective planted in long drifts in front of evergreens.

10 100 Bulbs Bulbs 6.00 6.00  $\frac{6.00}{6.00}$ Rembrandt Tulips

When the coloring matter of a "self color" has become split up into stripes and blotches, that particular flower is called "broken" or "rectified." When the Darwin Tulips "break" into these variations, they are called "Rembrandt" Tulips. They are very decorative but should be planted by themselves or in combination with the "Bizarres" and "Bybloemen" which are the broken forms of the Breeder Tulips. All require the same cultural treatment as the other May-flowering Tulips, blooming during the month of May in our latitude, and about a month earlier in far southern sections. In our list we offer what we consider the finest varieties. 10 100 Bulbs Bulbs

Lily-Flowered Tulips

Finest Mixed Rembrandt Tulips .........\$1.00

As the result of crossing the dainty pointed-petaled Tulipa retroflexa with a pink Darwin, we have here a new, very beautiful, and distinct race of Tulips having graceful, slightly reflexing flowers on tall, sturdy stems.

Retroflexa. Most effective on account of its simple beauty. The form is particularly impressive; the corolla in its lower part fills out roundly and delicately like an urn; then is somewhat contracted upward and again curved outward at the point of the three outer and narrower sepals. The stem has that slight amount of curvation which would redeem it from the appearance of formality. The color is a fresh honey-yellow, extremely beautiful; one of the most elegant of the family. Should be planted in groups of twelve to twenty-five among other plants and they will impress us as no other Tulip can. Very effective if grown in masses against purple Persian Lilacs and white-flowering shrubs. Height 18 inches...\$0.75

\*Sirene. A very beautiful flower. Rich cerise-pink with pale pink at the margins of segments, white base. Fine forcer. Great exhibition flower

## Botanical Tulips and Wild Species

Wonderful for the Bock Garden.
The general characteristics of the various species, all of which are natives of Asia Minor and Central Asia, are bright colors and recurved petals. These Tulips do not always feel happy in their new surroundings and after two, or possibly three, seasons, they will disappear. With care and the provision of suitable quarters they will flower quite satisfactorily. They feel best contented in rock gardens and borders.

# Single Early Tulips Including the Best of the Recent Introductions

They are the best fitted of all Tulips for forcing, and, if not grown too cool, some very early varieties may be had in flower by the end of December. When used for bedding, it is far better that new bulbs be secured each year, for the old bulbs will not do well the second season unless they have been allowed to mature and the foliage to die down before being removed from the beds. Even with the best care, it is uncertain whether the bulbs will again bloom successfully during a second season.

In the following list the handsomest sorts alone are represented, while many of the better known varieties are omitted because they are surpassed by the newer kinds. Detailed planting directions are included with the invoice.

# Double Early Tulips

The double varieties cannot be forced so early or readily as the singles. One of the earliest, Salvator Rosa, may be had by the middle of January, while varieties preceded by a (\*) may be flowered from January to March. The flowers are large and brilliant and are effective in beds or groups. If grown in pots, do not attempt flowering before they are well rooted.

# Narcissi - Daffodils

(American Grown)

Daffodils are not particular as to soil and will thrive for a number of years in ordinary soil. They are, with few exceptions, suitable for naturalizing, and, while preferring partial shade, will thrive in full sun exposure. They are very desirable for pot culture, three to five bulbs in a 5- or 6-inch pot producing an attractive group. By planting varieties in succession, a gorgeous display may be enjoyed throughout the first three months of the year.

# Select Exhibition Hyacinths

BULBS MEASURE 20 CENTIMETERS OR OVER AND ARE THE LARGEST OBTAINABLE

These are varieties selected for their large sized spikes, elegance of form, and beauty and richness of color. The bulbs are of mammoth size—the cream of the crop—and naturally command advanced prices. We offer this grade only in limited quantities and request early orders for them. Exhibition Hyacinth bulbs are unsurpassed for growing in pots but are not suitable for outdoor work; they are to grow in Hyacinth glasses; may be flowered in any large vase, if this is preferred to pot culture.

### PRICE, ALL BULBS AS LISTED BELOW: \$2.75 per 10; \$25.00 per 100.

La Victoire. Shiny carmine-rose, with large, well filled spikes. A splendid bedding variety.

Marconi. Bright deep rose; short, broad trusses, borne on stiff stems. A good forcer and fine outdoors.

LIGHT ROSE AND PINK
Lady Derby. Beautiful, clear rose-pink, with large, compact trusses. Early; fine for both forcing and bedding.
Pink Perfection. Light carmine-rose, with large, compact spikes. One of the best varieties in its class for pots.

Queen of the Pinks. A very lovely pink; trusses broad and large, with good sized bells and strong stems.

Perle Brilliant. Light blue, tinged lavender; splendid spikes with large, substantial bells. A fine pot Hyacinth and good for bedding.

Queen of the Blues. Clear, light porcelain blue; a strong growing variety with large, well formed trusses. One of the best of its color, particularly for bedding.

**Schotel.** Clear porcelain blue; beautiful long spikes on strong stems. An excellent pot Hyacinth and the best light blue bedding variety.

Grand Maitre. Deep blue with long, compact spikes of large bells, on strong stems. One of the most popular blues; fine for pots as well as bedding.

King of the Blues. Dark violet-blue; splendid large trusses. One of the best known blue Hyacinths. Good for late forcing and bedding.

PURE WHITE

Arentine Arendsen. One of the finest whites; long spikes with large, snowy white bells. Early, fine for forcing and a good bedder.

La Grandser.

La Grandesse. Pure white with fine, compact spikes. The best late forcing variety and fine for bedding as well.

L'Innocence. This is the most satisfactory all-around pure white. Compact spikes with large bells. Does well indoors and out.

Queen of the Whites. Pure white with long, well filled trusses of large, substantial bells. The finest white.

City of Haarlem. The finest of the yellows. trusses of orange-yellow bells. An exc for forcing and bedding. yellows. Well formed An excellent variety

Sir Wm. Mansfield. A splendid truss of ruby violet. The best of its kind.

## Named Single Hyacinths

We strongly recommend the use of Named Bedding Hyacinths for outdoor planting in preference to unnamed Hyacinths under color. The latter are made up of many varieties in mixture, which are not uniform in height, color, or time of blooming. When named bedding Hyacinths are planted, uniformity in color, height of plant, and time of blooming are insured and at a cost not much in excess of unnamed bedding Hyacinths. First size or exhibition size bulbs are too costly for bedding and flowers are too heavy, falling over from their own weight.

ROSE AND RED SHADES

La Victoire. Shining carmine; fine, upright spike.

Queen of the Pinks. Bright, glistening pink; tall, erect.

#### WHITE SHADES

L'Innocence. Pure white; large bells; fine spike. Queen of the Whites. Pure white; early.

BLUE SHADES

Grand Maitre. Deep lavender-blue; immense, loose spike. King of the Blues. Rich dark blue; large, perfect spike. Perle Brilliante. Light blue; large, erect.

City of Haarlem. Rich deep yellow; tall, erect spike. \$2.00 per 10; \$18.00 per 100; \$170.00 per 1000.

## Miniature or Dutch Roman Hyacinths

Bulbs Measure 14-15 Centimeters.

Bulbs Measure 14-15 Centimeters.

These are the 3-year-old bulbs of the Dutch Hyacinths, easily forced and largely grown for Winter flowering. Can be forced in pots, pans, or grown in bowls and vases in Holland Fiber. They bloom later than the true French Roman Hyacinths but produce larger spikes. Five to six bulbs can be potted in a 6-inch pot. Treatment same as for Dutch Hyacinths.

Miniature Hyacinths are splendid for forcing. They are distinguished from the ordinary Dutch Hyacinths by a looser flower spike and small, neat bells. The colors are delightful and when planted in low pots or pans, one color to a pan, the effect is light and graceful, and no more charming decoration could be found.

City of Haarlem. Yellow.

City of Haarlem. Yellow.

Grand Maitre. Lavender-blue.

La Victoire. Carmine-rose.

L'Innocence. Pure white.

Queen of the Pinks. Deep rose-pink.

Schotel. Light blue.

PRICE, ABOVE VARIETIES: \$1.25 per 10; \$12.00 per 100.

## French Roman Hyacinths

French Roman Hyacinths are among the earliest bulbs to be had in flower. The bulbs arrive from France late in August, and, like all bulbs grown in the south of France, they may be had in flower from November all through the Winter months, if potted up in September and at intervals of every two weeks. They are much prized for pots or cutting on acount of their graceful appearance and delicate fragrance. The bulbs are about the same size as the Miniature Dutch Hyacinths offered on this page, and may be planted six or seven to a 5- or 6-inch pot, or ten to twelve bulbs to an 8- or 9-inch bulb pan. The flowers are smaller than those of the Dutch Hyacinths, and are borne in great profusion, the larger bulbs frequently having three to five graceful spikes of bloom. The white variety is the most reliable. They are not hardy in our northern climate, and should not be planted outdoors.

## Wild Crocuses - Species for Rock Garden or Border

Besides the Dutch Crocuses there are certain species that blossom very much earlier in the year, often before the snow has gone. The flowers of these wild sorts are smaller than those of the Dutch kinds, but they are as vigorous and free as the others. Given a sunny position in the rock garden, or a sheltered position in grass where the sun may encourage them freely, they will surprise you by their hardy appearance in the face of cold and storms.

storms.	
For Rock Garden or Hardy Border. Bulb	s Bulbs

# Crocuses

#### DUTCH VARIETIES

Crocuses will grow in many positions—in the grass, in the flower borders, among shrubs, in the rock garden, in sun or shade, even under Beech trees. Perhaps the ideal position for them is one where they receive the sun but for part of the day. A position reaching out from beneath tall trees where the grass need not be mown until the pretty striped foliage is quite matured. In such a situation they will not be blanched by the too hot rays of the sun nor caught by the late frosts. They should be splashed upon the landscape with a broad brush—great irregular patches of the various Dutch varieties, one kind at a time, but each planting blending with the next.

## Freesia

This is one of the most beautiful of all Cape bulbs, possessing a peculiar grace of form, and its fragrance is most delightful, one pot of five or six bulbs being sufficient to perfume a whole house.

When planting Freesia bulbs in pots or pans, they may be spaced two inches apart and must be staked as they grow; if planted in benches they may be set four inches in rows two inches apart.

The soil should be a light sandy loam; old soil is the best in which some other crop has been grown during the previous season. This may be enriched with well-decayed stable or sheep manure. The best time to plant is September, if planted earlier they will come up uneven for the reason that the bulbs will not have had sufficient

To produce the largest and finest flowers they should be grown cool; a day temperature of 60 degrees and night temperature of 45 to 50 degrees suits them best; they like plenty of water at all times and especially so if they are subjected to high temperature.

are subjected to high temperature.

Furity. A magnificent, snowy white; of very large size and great length of stem. A truss bearing from 3 to 10 buds, of which	
six are often open at one time. Mammoth bulbs\$0.65	\$5.00
Splendens. Very good violet shade; good grower with large flowers; highly recom-	
mended to grow in quantity	6.00
Yellow Prince. Light yellow, overlaid with silvery sheen; very tall, strong grower with large, wide-open flowers; the buds have, upon opening, a gray appearance, but when finally open the flowers are of	
a beautiful yellow	6.00

# Rainbow Mixture of Freesias

The new colored Freesias which have been introduced lately have been selected from thousands of seedlings. Some of the seedlings not named are as fine as the named varieties. It is these better seedlings we offer. If you should live in that part of America where there is little or no frost during the Winter, plant some of these bulbs outside and you will be surprised at the wonderful cut flowers these mixed bulbs produce.

Per ten, 65c.

Per hundred, \$5.00.

# Lilium Candidum

(MADONNA LILY)

Choice Northern Grown. Arrive in August or September.

Maeterlinck refers to this loveliest of Lilies when he says:

"The great white Lily, the old lord of the gardens, the only authentic prince among all the commonalty issuing from the kitchen-garden, the ditches, the copses, the pools and the moors, among the strangers come from none knows where, with his invariable six-petaled chalice of silver, whose nobility dates back to that of the gods themselves, the immemorial Lily raises his ancient sceptre, august, inviolate, which creates around it a zone of chastity, silence and light."

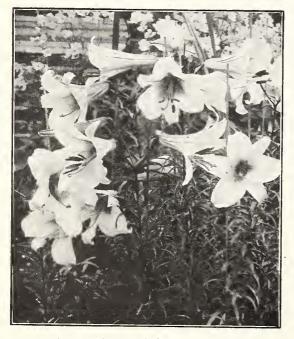

Be very careful that you plant the right type of this beautiful Lily in your garden. There is an early-flowering variety which is grown in the south of France. These should not be used in America; if planted in the garden, they are prone to disease and are unsatisfactory. In Europe this type is called L. candidum speciosum. This variety is only too often sold because they cost less.

The true type to use for the garden is the L. candidum from the north of France. This bulb is easily recognized by its white, fleshy scales, by those that know both types.

This Lily of all Lilies should be planted in quantity in every garden—emblem of purity, the inspiration of poet and painter for centuries, and a benediction in the garden when June is melting into July—their delicious fragrance is not equalled by any other Lily.

Plant in loam or sandy soil, surrounding the bulb with sharp sand and placing it somewhat on its side. An open, fully exposed place is best for it. After it has become fully established leave it alone as it much resents disturbance at the roots. If necessary to transplant, do so as soon as the flower stems die down.

Lilium Regale or Myriophyllum-Regal Lily.

Lilium Candidum-Madonna Lily.

# Lilium Regale or Myriophyllum

It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink, with a beautiful shade of canary-yellow at the center, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the Jasmine, and lacking the heavy, oppressive odor of most Lilies. Blooms out-of-doors early in July. (Bulbs ready late October).

Each Bulb STRONG BULBS\$0.50	10 Bulbs \$4.50	Bulbs
SELECTED BULBS	7.00	65.00

We are the largest growers of this Lily in the country, producing it by the thousands,

For other Lilies, see pages 30 and 31, or write for our Hardy Plant Catalog, which contains a complete list.

## Miscellaneous Bulbs and Roots for Fall or Early Spring Planting for Permanent Effects in Borders, Rock Gardens or Indoors

For planting in accord with the natural surroundings of your gardens, expressive of perfect harmony and good taste; along the woodland path, in wild flower sanctuaries, along brooks or ponds, or wherever naturalistic planting is wanted. For planting of banks or ground cover amongst Daffodils, Hyacinths or Tulips; in the border in drifts or as edging for flowerbeds.

t. Brigid. Finest Irish strain, showing a great many lovely shadings ......\$1.35 \$12.00 St. Brigid.

## Calla Lilies (Tender-Indoor Only)

These like a stiff, clayey soil with a small quantity of shredded cow manure. Bulbs should be set with the crown, or top, protruding just above the surface. When in growing condition, warm water given several times during the week will hasten the flowering period and increase the number of blooms. When using the large sized bulbs, plant but one in a pot; smaller ones, two. We call especial attention to the Yellow Calla, which is one of the grandest varieties in cultivation, and most valuable for house or conservatory decoration. See the description below. Plant Callas indoors only in the Fall or Spring of the year.

### Camassia (Hardy)

Perfectly hardy bulbous plants that thrive well in any situation and are excellent for naturalizing. 10 100 Bulbs Bulbs

12.00

## **Brodiaeas** (Hardy)

These plants have a small bulb, producing grassy leaves near the ground, and very slender, but stiff, naked stems bearing a head of waxy flowers of great lasting quality. All are pretty. Their culture is the same as for Narcissi, and just as easy as for that flower. They are easily naturalized in almost any soil. Plant them about 3 inches deep, and leave them alone. They are especially happy under oak and deciduous trees, in crevices in rocks, or in rough, gritty soils.

100 1000 Eulbs Bulbs Bulbs Bulbs Bulbs Bulbs Bulbs Bulbs

Coccines (Floral Firecracker). The stems rise to 2 feet, while the flowers are a vivid crimson tipped with pea-green. The resemblance to a bunch of firecrackers catches the eye at once. A group of these bulbs in a mass of ferns or light-foliaged plants is striking, and they do very well potted ......\$0.60

10 100

Bulbs	Bulbs
Luciliae (Glory of the Snow). A mass plant-	
ing forms one of the most sumptous dis-	
plays of floral beauty, a mass of blue and	
white, intense and brilliant. They bloom	
at the time of the Crocuses, producing	
dwarf flower spikes, bearing from 12 to 15	
flowers of a sky-blue with a pure white	
heart, creating a lovely effect. They	
should be planted in the Fall, three inches	
deep, about eighteen bulbs to a square foot,	
in a sunny location or in half shade and	
in places where they can remain undis-	
turbed for a number of years. The flowers	
will cross with one another and will seed	
themselves, forming natural colonies\$0.40	\$3.00
Sardensis. This is the earlier of the two va-	
rieties to come into bloom, and the first	
real blue flower of another year. This is	
a rich, blue self-color. The remarks made	
for the variety Lucilliae apply to Sar-	
densis	3.00

## **Eranthis**

## (Hardy-Give Slight Protection)

Bulbs Bulbs

Hyemalis (Winter Aconite). These produce at about the same time that the Crocuses are in bloom, little yellow flowers like Buttercups about three inches above the ground, with settings of fine green, frilled-like collars which never seem to mind the worst of weather conditions. They will thrive under trees where few other plants can hold their own. They seed themselves freely and colonies from self-sown seed are soon formed. Plant firmly two inches deep, in shade or half shade, about 18 bulbs to a square foot

Amaryllis Hippeastrum.

Bulbs Bulbs

## Fritillaria (Mission Bells)

EUROPEAN VARIETIES Imperialis (Crown Imperial). One of the most characteristic plants of old-fashioned gardens. It is the most robust of all the species. The flowers are borne in umbels on stout setms 3 to 4 feet high. Bulbs Bulbs 

## Galanthus (Snowdrops) (Hardy)

These are particularly effective under hedges, under cedar trees and in thin woodland. They are the first to open in the Spring and are very lovely. They dislike being moved and should be left alone to naturalize themselves. Plant two inches deep; mulch in Winter with straw, hay, leaves or well-decayed manure. The single-flowering Snowdrops, if they are left alone, soon take to producing double flowers. The differences and variations in the varieties of Snowdrops are so comparatively small that it does not seem worth while to offer them in variety ......\$0.60

Spanish Iris (Iris Hispanica)
(Half Hardy—Give Protection)

These beautiful bulbous Iris have appropriately been called the "Orchids of the Hardy Flower Garden." For best effects they should be planted in beds or groups of twenty-five or more, the larger the number the finer the effect. They grow from 18 to 24 inches high, and bloom from the end of May on through June.

## **Ixias**

(Half Hardy-Give Protection)

Desirable bulbs for forcing or outside borders. If planted outside they require covering during the Winter. 10 Bulbs 100 Bulbs ...\$2.50 Choice Mixed Colors ..... \$20,00

Leucojum Bulbs Bulbs

Vernum (Spring Snowflake). This is one of the earliest and most attractive Spring flowers. Growing from 6 to 8 inches high they bear dainty nodding flowers which are white, tipped with green. They should be planted in early Fall in a good, light, well drained soil in which they may be buried 4 or 5 inches apart in masses or bold clumps, to be effective, 2 inches deep, and then be left alone to bloom year after year. 1000 bulbs, \$90.00

## Ranunculus

(Half Hardy-Must Have Protection)

Double flowers on strong, straight stems 8 to 12 inches long. The colors range in a large diversified assortment. Excellent for forcing. 10 100 Bulbs Bulbs Double French Mixed. Strong roots ......\$1.00

## Muscari (Grape Hyacinths)

	0 bs	100 Bulbs
Botryoides coeruleum. Bright blue; very		
free grower which naturalizes easily, flowering at the time of the Crocuses \$0.5	50	\$4.00
Botryoides album. This is the white form which is very pretty planted with the blue		
variety of this type	75	6.00
Heavenly Blue. While there are several kinds of Muscari, we consider this variety the best for mass planting. Their flowers open just about the time that the Chionodoxas and Crocuses are going off. They do very well in the wild garden and also in the grass if it is not too rank. They are nice under trees and along the borders where they may be left undisturbed. They		
will seed themselves and make pretty effects when once established	50	4.00

## Scillas (Squills)

These flourish in sun as well as in shade under trees. They are not particular about the soil in which they grow. They are ideal for the wild garden but they are not to be despised in the border, especially if they are left alone for two or three years without being disturbed in any way. They are splendid in the rock garden. Produce drooping bell-like flowers. Bulbs Bulbs

ifolia. Dwarf, rich blue flowers, which bloom with the Winter Aconite in March. Excellent for clumps, edgings and rockwork \$5.00 Campanulata Blue. Porcelain blue, candel-abra-shaped bells, blooming with the May-flowering Tulips. Plant four inches deep..

abra-shaped bells, blooming with the Mayflowering Tulips. Plant four inches deep..

Campanulata rosea. This is a soft lilac-rose
form of this type
Campanulata White. The pure white form..

Nutans. The True English Blue Bell. Shepherd's crook-shaped flowers; very showy
and vigorous; very effective planted with
the May-flowering Tulips. Plant four
inches deep in shady or sunny situations.
Mulch in Autumn with leaf-soil, leaves or
very well-rotted manure .......

Peruviana. Very good for indoor culture;
make bold spikes resembling the Hyacinth;
good in rock gardens with slight protection
during the Winter ......

Sibirica Blue (The Siberian Squill). This is
the earliest to flower, connecting the Fallflowering of the Crocuses with that of the
Narcissi. They are fine for naturalizing
under trees or in open woodland, producing drooping, bell-like flowers on stems 3
to 4 inches in height. Succeed very well
in the rock garden. Color bright blue.
Plant three inches deep in shade, half
shade, or in the full sun .......

PLANTING. The table below shows the number of plants or bulbs required to fill a circular bed of the dimensions given. In planting begin at outside row—where 6 inches apart, 3 inches from edge of bed; where 12 inches apart, 6 inches from edge of bed. It is customary among professionals in planting a bed to set the plants or bulbs somewhat closer together in the two outer rows, giving more space between each plant or bulb toward the center of the bed.

\$9.50

Diameter of bed	6 in.	12 in	18 in.	24 in.	30 in.	Diameter of	6 in.	12 in.	18 in.	24 in.	30 in.
	ap <b>a</b> rt	apart	ap <b>ar</b> t	apart	apart	bed	apart	apart	apart	apart	ap <b>a</b> rt
3 feet 4 " 5 " 6 " 7 " 8 " 9 " 10 "	28 48 80 112 152 200 256 320 380	7 12 20 28 38 50 64 80 95	6 8 13 17 23 28 36 42	7 9 12 16 20 24	13 16	12 feet 13 " 14 " 15 " 16 " 17 " 18 " 19 " 20 "	452 528 612 704 804 904 1016 1132 1256	113 132 153 176 201 226 254 283 314	50 59 68 78 89 100 113 126 139	28 33 39 44 50 57 63 71	18 22 25 28 32 36 40 46 50

A square bed will take about the same number of plants. For an oval bed, add length and breadth and divide by two. For example, an oval 9 feet long by 7 feet wide will require the same number of plants as a circular bed 8 feet in diameter.
